# Autonomous Drone Delivery System Using Call-and-Return Architecture

Case A: Urban Drone Delivery

* Drone Mission Executive
* External comms node
* Navigation
  - GPS parsing
  - Obstacle Avoidance Radar
  - IMU Sensor Fusion
* Package Handling
* Power Management

Case B : Warehouse Automated Drone Call-and-Return Architecture

* Warehouse Flight Executive
* External comms Manager
* Path Planning
  - collision avoidance lidar
  - Floor Marker Tracking
  - Fleet coordination logic
* Barcode Scanning
* Battery Management
